Summary

I am a novice front-end developer. In June 2020 I completed the "JavaScript Development Online" course at the RSSchool. There I learned how to build adaptive web pages and web applications, and how to work with APIs and Git. I keep improving my skills through self-education by watching relevant YouTube channels, and reading popular programming blogs and books. For example Youtube channels: Vladilen Minin, RSSchool, Glo Academy, Web Dev Simplified; blogs: Medium Daily Digest, FreeCodeCamp, Community-Z, GeekBrains. I improve the quality of my code every day by working on new self-assigned projects, taking online quizzes, and participating in short intensive online lessons.
